1	K-clamp	piece	4
2	Badminton flight clamp	piece	2
3	weigher	1900g	1
4	Spanner	3mm	1

3.2. Compose

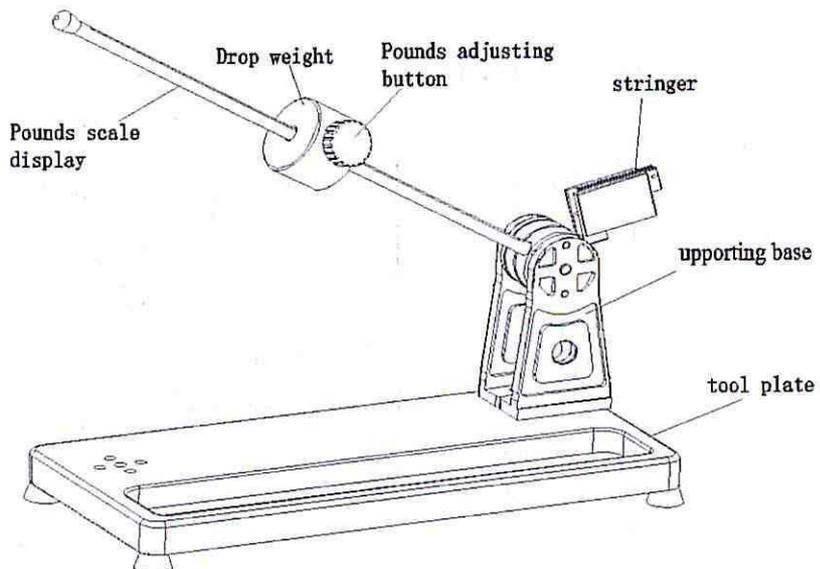

1. Whole machine

2. Racket-clipping part

3. Main machine

Use instruction

4.1. Unpacking and assemble

1. Carefully take out the machine and accessories and check whether there is damage for the package and machine.
2. Put the machine on flat table and lock the screw of work-plate and rotational axis
3. The stringer can be rotating clockwise 360 degree

Attention: All of the matching screws supply by Pro's Pro are steel products, please lock them tightly when install the machine.

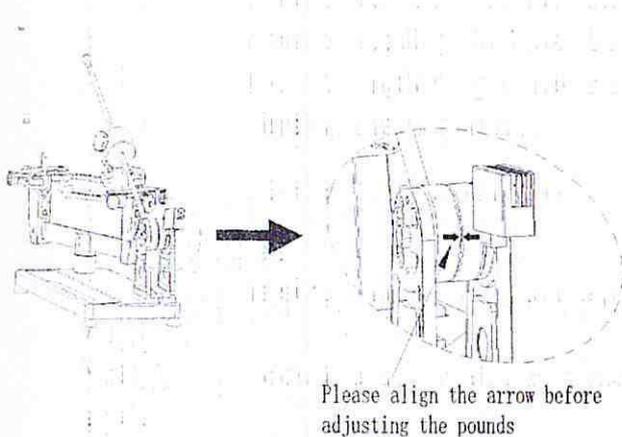

4.2. Pounds set and operation

A: Pounds set

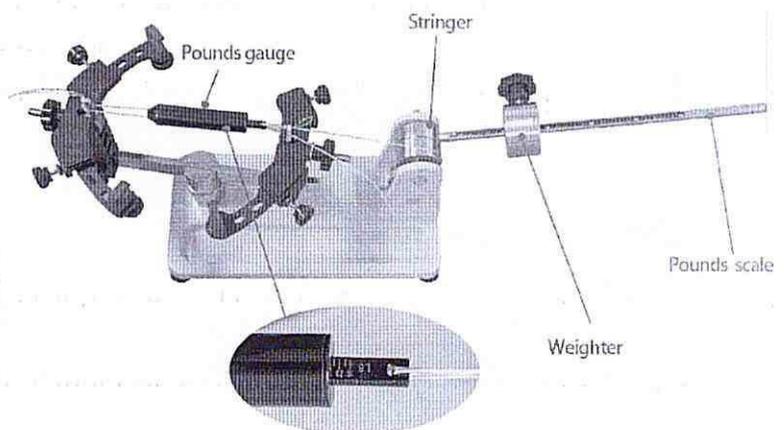

Please lock the screw after moving to the pounds you need. The pounds is subject to the inside-end of drop weight.

Note: Please lock the screw tightly which cannot face right on the scale value, or it may ruin the scale.

B: Operation: before stringing, please align the scale and lay down the pole to the direction of work-plate like the picture 1. Please align the arrow before adjusting the pounds.

Picture 1

Picture 2

C: Using method for pounds gauge

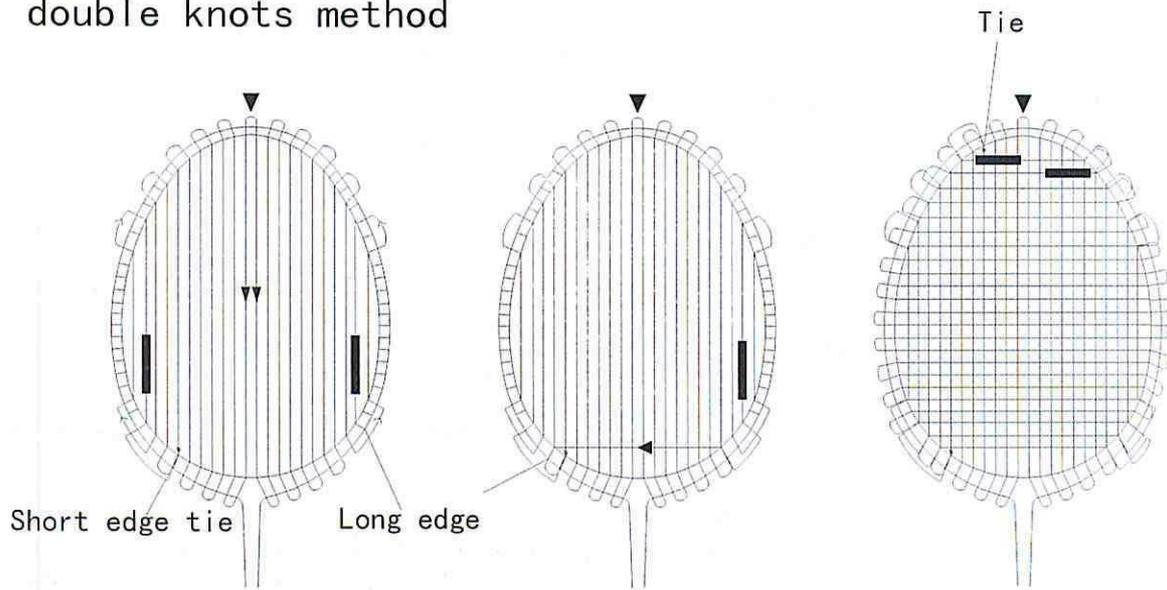

1. There are two sides of the pole inside the pounds gauge: LB range from 10 to 100 LBS and KG range from 10 to 40 KGS
2. Please tie the string on both ends of the pound gauge, one end to the clipping pin and one end to the stringer
3. Adjust the pounds you need.
4. If the display of the pounds gauge and scale are the same or 1 LB difference, then it is OK.

Note: The machine adopts the lever principle, the pounds may be affected by angle, speed and spring of string when stringing. So please be familiar with operation of the machine first and then stringing the racket.

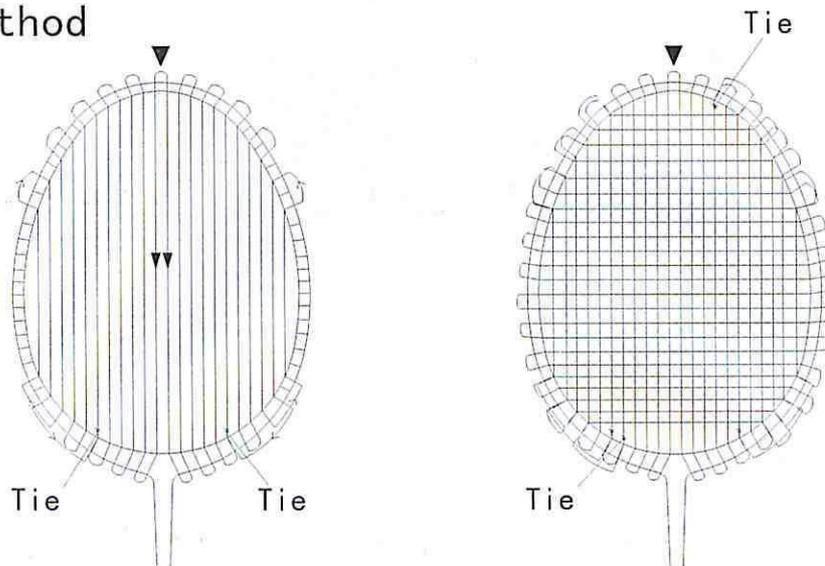

Stringing method

5.1. Badminton racket

*Traditional single line double knots method

*Double lines four knots method

Maintenance and trouble shooting

Maintenance

- 1、 Don't place the machine in damp or other bad environment.
- 2、 Every half a year,inject a little lubricant to the adjusting button of clipping pin and clipping arm and other steel part
- 3、Don't infiltrate the water,oil and the other acidic material and alkaline material into machine.
- 4、 Use soft cloth with a little alcohol to clean surface dust.Don't use the easy volatility liquid to clean surface to roast paint part.

Trouble shooting

phenomenon	Reasons	methods
The stringer get slippery or cannot clip the string tightly	①Different strings diameter. ②The contact-part of stringer and string has oil or wax stains	①Please adjust the gap of the stringer by the adjusting button. ②Clean by clean soft cloth with some alcohol.
The pounds are not accurate.	①Donot align the arrow before adjusting the pounds.	①Please align the arrow correctly. ②Contact with the factory.
